

## How to customize an Oasis

!!! warning "Attention"

This part of the documentation is still work in progress.

This is an incomplete list of potential customizations. Please read the respective guides to learn more.

- Installation specific changes (domain, path-prefix): How to install an Oasis (install.md)
- Restricting user access (admin.md#restricting-access-to-your-oasis)
- Write .yaml based schemas (../customization/basics.md) and ELNs (../customization/elns.md)
- Learn how to use the tabular parser (../customization/tabular.md) to manage data from .xls or .csv
- Learn how to develop plugins (../plugins/plugins.md) that can be installed in an Oasis
- Add specialized NORTH tools (../manage/north.md)
