!!! warning "Attention"

    We are currently working to update this content.

This video tutorial explains the basics of API and shows how to do simple requests

against the NOMAD API.

!!! note

    The NOMAD seen in the tutorials is an older version with a different color theme,

    but all the demonstrated functionality is still available on the current version.

    You'll find the NOMAD test installation mentioned in the first video

    here (https://nomad-lab.eu/prod/v1/test/gui/search/entries).
